Interest-bearing debt to total assets ratio	42.5 %
Interest-bearing debt to total appraisal value ratio	48.1 %
Long-term interest-bearing debt ratio	100.0 %

* The above interest-bearing debt ratios are calculated as of matter of convenience using the following formulas:

- Interest-bearing debt to total assets ratio (%) = Total interest-bearing debt ÷ Total assets × 100
Total assets are calculated using the figures at the end of the fiscal period as announced in the most recent Financial Report.
- Interest-bearing debt to total appraisal value ratio (%) = (Total interest-bearing debt + Security deposits and guarantee money without reserved cash) ÷ (Total estimated latest appraisal value of specified assets + Cash and Bank Deposits) × 100
Security deposits and guarantee money without reserved cash and estimated appraisal value of specified assets are calculated using the figures at the end of the fiscal period as announced in the most recent Financial Report.
Cash and bank deposits are calculated by deducting the balance of retained earnings from the figures at the end of the fiscal period as announced in the most recent Financial Report, with further considerations given to property acquisition and disposition amounts, and debt financing and repayment amounts to date.
- Long-term interest-bearing debt ratio (%) = (Long-term debt + Investment corporation bonds) ÷ Total interest-bearing debt × 100

** Percentage figures are rounded to the nearest first decimal place.
