##### Incentive system in which “the Investment Management Company is in the same boat as unitholders”

Investment management fee is linked to “appraisal value of assets,” “cash flow” and “price of investment unit,” which are the three indexes indicating unitholder value, and acquisition incentive fees, etc. that are not recorded in the income statement are not adopted.

<Investment Management Fee Structure and Remuneration>

Remuneration	Criteria for calculation	Remuneration Ended Jul. 2021 (FP 36)
	Reason for adoption	
Base 1 (Linked to asset valuation)	Asset value at the end of previous period × 0.125% (0.120% for the portion exceeding 200 billion yen and 300 billion yen or less) (0.115% for the portion exceeding 300 billion yen)	¥377 mn
	It will be linked not to the total investment amount but to the total asset valuation and motivates the enhancement of asset value even after the acquisition of properties.	
Base 2 (Linked to cash flow)	Standard cash flow in current period <sup>(Note)</sup> × 6.0% (5.7% for the portion exceeding 5.0 billion yen and 7.5 billion yen or less) (5.4% for the portion exceeding 7.5 billion yen)	¥315 mn
	Motivating the increase of distributions through the increase in rent revenue and reduction of expenses.	
Incentive Fee (Linked to investment unit price)	(Average investment unit price in current period - Highest average investment unit price over all previous periods) × number of units × 0.4%	Not occurred
	It will motivate the increase in investment unit price and efforts on the overall asset management business such as finance, IR, governance and compliance in addition to the normal asset management business will be enriched.	

(Note) Standard cash flow here shall be the amount derived by subtracting an amount equivalent to 50% each of profit or loss from the sale of specified assets and profit or loss from the valuation of specified assets from net income before income taxes, plus depreciation and amortization of deferred assets.

(Note 2) NOI yield after depreciation is obtained by subtracting depreciation and loss from the retirement of fixed assets from NOI.

(Note 3) Probable Maximum Loss (PML) refers to the expected maximum loss ratio caused by earthquakes. Although there is no single authoritative definition of PML, PML as used here is the ratio of expected damage caused by a small- to large-scale earthquake that will occur within the next 475 years to the replacement value. This figure was calculated upon request from TOKYU REIT by a third party who possesses expert knowledge. Calculations also include data relating to individual property surveys, assessment of building conditions, conformity to architectural design, status of ground surveys of local areas and structural evaluation. Damage in this instance refers to property damage and does not include secondary damage such as loss of life and damage to surrounding facilities. In addition, damage is limited to structural damage and damage to facilities and the building's interior and exterior and does not cover damage caused by earthquake fire and fire damage from surrounding facilities.

(Note 1) The figures in "Retail Properties Total," "Office Properties Total," "Residential Properties Total," and "Land with leasehold interest Total" indicate figures obtained by the following formula: Sum of NCF (Direct Capitalization Method) of subject properties/Sum of appraisal values of subject properties.

(Note 2) J: Japan Real Estate Institute, V: Japan Valuers Co., Ltd., D: Daiwa Real Estate Appraisal Co., Ltd.

(Note 3) Disposed on August 31, 2021.

(Note 4) The NCF (Direct Capitalization Method) and NCF Cap Rate (Direct Cap Rate) for Tokyu Toranomon Building indicate the figures based on the discount rate under the income approach for the land and building after extension.

(Note 5) Since the property was acquired during the fiscal period ended July 2021 (FP 36), the figures upon the acquisition are indicated for the appraisal value, NCF (Direct Capitalization Method) and Cap Rate (Direct Cap Rate) for the fiscal period ended January 2021 (FP 35).

(Note 6) For the two properties, direct capitalization method is not employed for its appraisal value. Accordingly, annual cash flow and discount rate under the DCF approach are indicated for NCF (Direct Capitalization Method) and NCF Cap Rate (Direct Cap Rate).

(Note 7) Disposed on August 2, 2021.

(Note 8) Figures for 60% co-ownership interest are indicated. Disposed 40% co-ownership interest on September 28, 2020. Scheduled to dispose 30% co-ownership interest on December 24, 2021, and 30% co-ownership interest on February 25, 2022.

\* Appraisal Value is determined by using several methodologies including the direct capitalization approach and DCF approach. Therefore, the Appraisal Value may differ from the above NCF figures divided by the NCF Cap Rate. Therefore, the total change in NCF and change in NCF Cap Rate may not add up to Increase/Decrease (%).
